

YOUR VILLAGE NEEDS YOU!

Tackling the climate & environment emergency together

FREE Meeting on insulating your home or business & using renewable energy

7.00 pm on Monday 9th March

Harley Village Hall, nr' Much Wenlock, SY5 6LP

No booking needed. Parking available.

Are you looking to switch to a cleaner, more renewable way of producing energy for your property? Do you want to improve your home's energy performance, save money on your energy bills and improve comfort?

Environmental Scientist Stuart Link from Rural & Country Energy will provide practical advice on renewable energy systems including Solar PV, Lithium Battery Storage and Air Source & Ground Source Heat Pumps, as well as government tariff schemes.

Reducing heat loss is one of the most effective ways of improving efficiency through insulation, replacing windows and improving airtightness. Local RIBA architect Tristan Ralph from Tesha in Much Wenlock will highlight available options and how to avoid unnecessary costs and problems associated with poor ventilation and condensation.

Short presentations with lots of time for Q&A.

About the meeting: Organised by residents in Cressage, Much Wenlock and Harley concerned about the climate emergency. We meet to share ideas, learn from each other and organise community events to make a positive difference to the climate and environment. To hear about future events email suzie.burnell@btconnect.com.
